

bizmile company edition - Fact Sheet

making employee car mileage reimbursement a "business no brainer"

January 2012

Intro: How Bizmile Tracker "audited" mileage solution works:

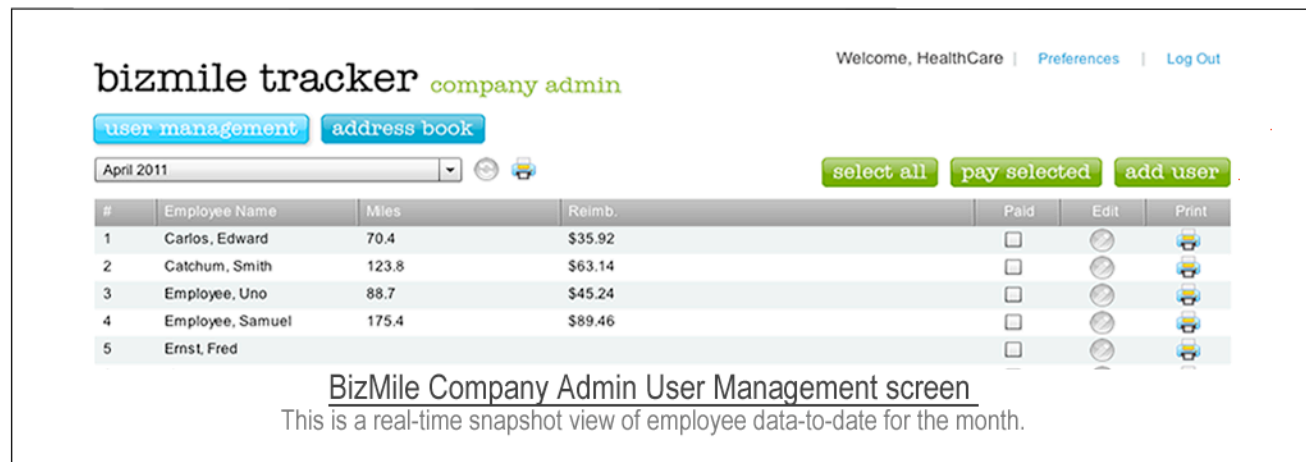

Reimbursable mileage is a significant expense when your workforce must drive to do their jobs offsite and it is a hassle for all concerned to administer and document. BizMile manages a workforce's mileage better and faster than any other and it keeps it simple, too – both for company admin staff to implement and even the non-technical employee to use.

BizMile logs are facts. Validated, audit-quality logs save you 15% to 25% in the first month and every month after that. BizMile does logs 80% faster than manually and employees actually like using it because it makes their lives just a little easier. Here's how in two easy steps:

1. Employees get a password to their individual Web account via email.
2. Employees complete their own online logs in record time using their appointment addresses and date.

Bizmile does the rest. It manages even very long master company address books, serving up relevant addresses instantly. It calculates an accurate trip distance, factors a custom rate and posts total mileage by employee – in real time – to the dashboard view of the Company Admin User Management screen. Designated staff has full control over workforce accounts. Reports offer a drive time baseline - both for individual employee trips and a cumulative employee drive time for the monthly pay period.

BizMile saves 15% to 25% on reimbursement payouts

The screenshot shows the BizMile Company Admin User Management interface. At the top, it says "bizmile tracker company admin" and "Welcome, HealthCare | Preferences | Log Out". Below this are buttons for "user management" and "address book". A dropdown menu shows "April 2011". To the right are buttons for "select all", "pay selected", and "add user". The main part of the screen is a table with columns: #, Employee Name, Miles, Reimb., Paid, Edit, and Print. The table contains five rows of employee data.

#	Employee Name	Miles	Reimb.	Paid	Edit	Print
1	Carlos, Edward	70.4	\$35.92	<input type="checkbox"/>		
2	Catchum, Smith	123.8	\$63.14	<input type="checkbox"/>		
3	Employee, Uno	88.7	\$45.24	<input type="checkbox"/>		
4	Employee, Samuel	175.4	\$89.46	<input type="checkbox"/>		
5	Ernst, Fred			<input type="checkbox"/>

Benefits to Business:

Very easy for non-technical employees to use

BizMile had to be easy because it was originally developed to help stressed out, pressured individuals under an IRS audit deadline.

"Thank goodness for Bizmile! It has been easy for our employees to use with just a couple quick clicks, and everything is now saved electronically."

Save employee time – do necessary logs in 80% less time and increase workforce productivity

Mileage expense reporting is inconvenient. With BizMile, employees and staff are greatly relieved of a recordkeeping burden.

SaaS accounts are secure and data is safe

BizMile is Software-as-a-Service (SaaS) so all data is safely housed behind encrypted security walls in the industrial-strength Amazon cloud.

BizMile gives business an accurate distance and no arguments

Using state-of-the-art Internet navigation standards and the best geo data commercially available, BizMile calculates the trip distance as fact.

BizMile is an "audited" tool for mileage

If your business needs assurance of all expenditures, BizMile provides it for mileage — just as receipts do for other expenses.

BizMile supports and supplements existing business processes

BizMile does its job in parallel with existing ERP/CRM systems or can work independently as a mobile workforce reimbursement solution.

BizMile is green

*"We use to keep track of the mileage by paper.
Thank you again Bizmile for making our work lives a bit easier, and helping us save the planet!"*
