

making employee car mileage reimbursements a "business no-brainer"

How much will the BizMile "validated" mileage solution save?

Not only will your employees prefer using BizMile because it relieves them of an administrative burden, but it will save your company money because BizMile logs are facts not "Guess-timates". The immediate savings is between 15% to 25% to employee reimbursable payouts – starting in the first month and every month after that.

"With BizMile, our mileage tracking system has finally joined the 21st Century."

Using an average daily employee drive of 20 miles, a mileage rate of \$.51 and the 15% average for the savings rate with BizMile, a 100 person mobile workforce saves the following:

	Average mileage Costs per employee	100 employee Mileage costs before Bizmile	100 employee Mileage costs with Bizmile	100 employee savings with BizMile	100 employee BizMile costs
Per Month:	\$ 220/ mo. ea	\$22,000	\$18,700	\$3300	\$ 400
Per Year:	\$2640/ yr. ea	\$264,000	\$224,400	\$39,600	\$4,800

BizMile's net gain to the bottom line is \$29 per employee, per month or \$348 per employee, per year. This kind of ROI is the reason Bizmile is the "business no-brainer" for mileage.

And employees saved time, too.

With the easy-to-use tools employees can get back to work 80% faster. BizMile tools had to be easy because they were originally developed for stressed out, under pressure individuals in an IRS audit.

Productivity Gains /user <i>(See assumptions below.)</i>	Average Reimbursement	Time spent w/ manual methods	Time spent with BizMile	BizMile time savings
One employee Monthly	433 miles / mo.	3.3 hrs./ mo.	35 min./ mo.	2.7 hrs. / mo.
One employee Yearly	5196 miles / yr.	40 hrs / yr.	7 hrs / yr.	32 hrs / yr.

Assumptions are as above: a mobile workforce employee drives 433 miles per month on average. At 8 miles per trip, each has a total of 50 trips per month. The manual documentation time of 3 to 6 minutes per trip is 200 minutes or 3.3 hours per month. Total time to document the month's mileage with BizMile is only 30 to 40 minutes.

"BizMile Tracker is so easy to use and so much faster to enter miles. I love that it figures the miles for you and it saves the addresses. Wow! Great find!"
